McBeath House Residence ~310m <sup>2</sup>   Blue Sky Architecture   Location: West Vancouver, BC Responsibilities: Building permit drawings, 3d visualisation, physical model-making	2	0	0	8
The Terracott Experimental Shelter   Location: Grymsdyke Farm, UK Starting from clay, I make and inhabit a shelter of brick. My interaction with the material raises questions of the role of the hand, embodied energy, craft, and place in contemporary design.	2	0	1	3
Re(City) Competition Entry   Location: North America Re(city) reimagines the site of a big box store as a nexus not only of consumption, but also of production. By combining the existing retail functions of the store with on-site recycling facilities, it creates an ecosystem of material flows, which eliminates waste, encourages local economies, and provides impetus and construction products for the densification of the suburbs.	2	0	1	2
Ark Design Project   Location: Rome, Italy   Team: Virginia Fernandez The site of this museum at Porta Portese in Rome is a confluence of linear systems-the water of the Tiber, the gate within the papal walls, and the remains of a railway infrastructure that has accommodated ad-hoc construction and an informal mercantile culture. Ark incorporates the Arsenale Pontificiale into a new, linear museum-system, maintaining the site's heritage while providing a 'flagship' destination for the revaluing of the Tiber.	2	0	1	0
